

(RC) Roof Curb – Insulated

Description:

The RC insulated roof curb is formed and welded from 16ga galvanized material with a wood nailer attached to the top. A rigid 1-1/2" 3# insulation is attached to the inside of curb for thermal and acoustical properties. The bottom of the curb has a 2" flange out on all 4 sides to secure and seal up easily when roofing material is applied.

Standard Construction:

16ga galvanized steel – welded
 17-1/2" Height
 1-1/2" 3# density rigid thermal and acoustical insulation
 2x2 non-treated wood nailer

Options:

Damper tray
 No wood nailer – (deduct 1-1/2" for actual height)
 Sizes that increase or decrease
 ** Other sizes available **

Model: RC
 Roof Curb – Insulated
